As you may know, a bill was filed recently that aims to compensate North Carolina residents who were sterilized against their will between 1933 and 1974. Under this bill, over eleven million dollars of the state's budget will be used, paying fifty thousand dollars to both living and dead people who underwent the procedure. This would make North Carolina the first state to offer such compensation.

With that information, would you support or oppose this bill?

CIVITAS INSTITUTE

Still thinking about this issue, please tell me which opinion comes closer to your own...

Some people say that the proposed bill is a step in the right direction. They say that while nothing will make them whole again, giving each person some financial compensation is a start. They also say it would be a milestone for North Carolina to be the first state to institute such a program.

Other people say that the proposed bill is a bad idea because financial compensation after all these years is an empty gesture, and there are better and more appropriate ways to acknowledge this part of the North Carolina's past, and the plight of those involved.
