North Carolina's Medicaid program offers only one set of coverage options for enrollees, and the state directly reimburses medical care service providers using taxpayer dollars. Pilot programs like one in Florida instead offer Medicaid enrollees a variety of insurance plans from which they can choose, and the state's Medicaid program then reimburses the insurance plan on a risk-adjusted per enrollee basis. The insurance company in turn has an incentive to efficiently provide coverage, and also assumes the risk for fraudulent claims.

Would you support or oppose North Carolina adopting a Florida-style Medicaid reform in which enrollees are offered choices of insurance plans they can enroll in?
