As you may know, the Justice Department, the North Carolina NAACP and American Civil Liberties Union have all filed lawsuits against North Carolina's new voter ID laws. The lawsuits challenge the requirement of voters to present photo ID at the polls, and calls for a return of same-day registration and a longer timeframe for early voting and vote by mail. With that in mind, please tell me which of the following opinions comes closer to your own.

Some people say the law will protect the state from voter fraud and that the lawsuits filed are influenced by liberal special interest groups. They agree with those who say that the Justice Department seems to pick and choose the states that they challenge the law in and that these suits are political.

Other people say that the law suppresses the vote amongst minorities, who they claim are less likely to have a state issued photo ID. They say that the restrictive laws were politically influenced and an overreach and unnecessary.

Thinking about the economy, in your opinion, how much longer do you think it will take for the economy to improve and the current recession to end? If you think the current recession has ended just say so.
