QUESTION 12:
In addition to increased federal borrowing and spending, North Carolina taxpayers would have to soon spend another $600 million a year for the state's share. This is money that comes from the same fund which supports education and public safety. Knowing that information, do you support or oppose North Carolina expanding Medicaid?

Table 21-1
QUESTION 13:
In 2005, the North Carolina State Legislature passed a law that allows for the sale and distribution of beer with a higher alcohol content. This legislation created a fast-growing microbrewery industry resulting in over 150 new microbreweries and new jobs in small communities across the state. Do you think state lawmakers should continue to reform regulations to encourage the continued growth of the industry?

QUESTION 13:
In 2005, the North Carolina State Legislature passed a law that allows for the sale and distribution of beer with a higher alcohol content. This legislation created a fast-growing microbrewery industry resulting in over 150 new microbreweries and new jobs in small communities across the state. Do you think state lawmakers should continue to reform regulations to encourage the continued growth of the industry?

Table 23-1
QUESTION 15:
When it comes to regulating the sale of beer in North Carolina, which of the following comes closer to your own opinion.

Beer producers should be allowed to self-distribute and maintain their branding rights to the retailer of their choice as-long-as they follow the laws governing the sale.

The State should require beer producers to use a third party distributor who is paid to distribute their beer and will require the brewery to give up control of their branding rights and decisions of who and how their beer is sold to retailers.

Table 29-1
QUESTION 21:
There is a proposal for an amendment to the North Carolina constitution that would prevent the legislature from increasing the income tax more than a half percent above the current rate. For example, currently the highest income tax rate in the state is 5.49 percent, so the Constitution would cap the rate to a maximum of 5.99%. If the rate were lowered to, say, 5 percent, then the new cap would become 5.5%. Would you support or oppose this amendment?

QUESTION 22:
Recently, the NCAA, the ACC, and other non-profit organizations have participated in boycotts of North Carolina, by relocating events, due to their opinion on House Bill 2. In your opinion, should non-profit organizations lose their tax exempt status for participating in economic boycotts as a method of administering economic harm and lobbying lawmakers to achieve a political goal, such as the repeal of House Bill 2 in North Carolina?

QUESTION 25:
In 2016 North Carolina was rated the 2nd best state for business by Forbes Magazine and the 3rd best state for business by Chief Executive Magazine. According to the Federal Reserve North Carolina had one of the fastest growing economies in the country and according to the North Carolina Department of Commerce added 80,000 new jobs in the last year. With that in mind, in your opinion, is House Bill 2 hurting the North Carolina economy?

QUESTION 27:
Which of the following statements most closely reflects your views on international trade:

Free trade benefits all nations involved because both sides always gain from voluntary exchanges, and it allows consumers access to goods they desire at the lowest possible price.

Free trade hurts all nations involved because countries would be better off if they were self-sufficient and didn't trade at all.

Free trade hurts the wealthier nations involved because they lose jobs to poorer nations who pay lower wages.

QUESTION 28:
Which of the following statements most closely reflects your thoughts on imposing an additional tax or tariff on goods imported into the US from other countries:

Some people say that it will help the US economy because it will protect domestic manufacturers from foreign competition.

Other people say that it will hurt the US economy because it will force domestic manufacturers to pay more for the imports they use, causing them to scale back on production. They also say it will force consumers to pay more for goods they need, causing them to scale back on consumption leading to further job losses.
