This Statewide Survey of NC Timed for Release Exactly 6 Months Before Iowa Caucuses, 7 months Before NC Votes Are Counted On Super Tuesday:

Eligibility for inclusion : In order to qualify for inclusion in the portion of this SurveyUSA poll that asks likely Democratic primary voters which Democrat they would vote for in a primary "today," a North Carolina adult age 18+ had to be 1) registered to vote in the state of North Carolina as a Democrat or unaffiliated voter; 2) had to indicate that (regardless of which political party he/she might be affiliated with) if there were a Presidential primary "today" in NC, he/she would be certain to vote in the Democratic primary (not the Republican); 3) on a scale of 1-to-10, had to have a strong interest in current events; 4) on a scale of 1-to-10, where 10 means the respondent "spends hours every day reading, watching and talking about the Presidential election," had to be actively focused on the candidates and the campaign; and 5) had to have been aware of the Democratic debates taking place in Detroit. These 5 filtering criteria were designed intentionally to winnow North Carolina's 6.7 million registered voters into the tiniest subset who are paying close attention to the Democratic campaign, to reduce as much as possible the extent to which high name-recognition (only) might account for any one candidate's lead or strong showing and might give "new to the stage" less well-known Democrats a chance for their support to more easily surface. A total of 2,600 NC adults were interviewed online 08/01/19 through 08/05/19. Of the adults, 2,113 are registered to vote in NC. Of the registered, 534 passed all 5 SurveyUSA screening criteria and were counted as a "likely" NC Democratic primary voter and asked, "Which Democrat would you vote today ?" All NC registered voters were asked the hypothetical, general-election Head-to-Head match-up questions. All registered voters, as indicated, were asked the questions about healthcare, patriotism and racism. During the field period for this survey, 31 individuals were murdered in 2 separate mass shootings. SurveyUSA's best estimate is that approximately 72% of the interviews for this survey were completed before news broke midday 08/03/19 of the 1st mass shooting in El Paso TX and approximately 78% of the interviews for this survey were completed before Americans woke up Sunday 08/04/19 to news of the 2nd mass shooting in Dayton OH. In 2020, North Carolina's presidential primary is 7 months from today, 03/03/20. 110 convention delegates will be awarded proportionately, so the relative strength of those candidates finishing in 2nd, 3rd or 4th place is significant.

6 Democratic candidates for President debated this week in Detroit. Which best describes you:

I watched the debates from beginning to end on both nights
I watched some of the debates "live", but mostly I saw highlights afterwards
I did not watch any of the debates "live", but I saw news coverage afterwards
I did not watch the debates or see any news coverage of the debates
I was not aware the Democrats were debating

What is the very first thing any Democrat should do if they are elected President in 2020? (answer choice order rotated)

Take guns away from gun owners? Raise taxes? Restore the rule of law? Encourage the Federal Reserve Bank to lower interest rates? Repair damage done by the previous President? Embrace all Americans? Address climate change? Reach out to our traditional allies? Build a wall between the USA and Mexico? Reduce the disparity between the rich and the poor? Relax bureaucratic regulations? Or something else?

31 What is the very first thing any Democrat should do if they are elected President in 2020? (answer choice order rotated)

Take guns away from gun owners? Raise taxes? Restore the rule of law? Encourage the Federal Reserve Bank to lower interest rates? Repair damage done by the previous President? Embrace all Americans? Address climate change? Reach out to our traditional allies? Build a wall between the USA and Mexico? Reduce the disparity between the rich and the poor? Relax bureaucratic regulations? Or something else?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
